Microsoft

The Microsoft Supplier Code of Conduct has been updated

Microsoft's Supplier Code of Conduct (SCoC) outlines the standards of behavior we expect from our suppliers and their employees, agents, and subcontractors while on Microsoft property, or doing business with or on behalf of Microsoft. Our greatest impact happens when we work together with shared values and goals.

As of July 8, 2026, the Microsoft SCoC has been updated to reflect current company standards and supplier requirements. The SCoC is a contractual requirement*; suppliers **must comply** with the changes within 30 days of this notice. Additionally, suppliers are expected to self-monitor their compliance.

**The terms of Microsoft's principal supplier agreements and Purchase Order (PO) Terms and Conditions require suppliers to comply with the most current Supplier Code of Conduct (SCoC).*

What you need to do

1. **Review** the updated Microsoft Supplier Code of Conduct.
2. Meet your annual **SCoC attestation requirement in SupplierWeb**
3. **Review and update your company's contact information in SupplierWeb** to help us share information with the right individuals.
4. Ensure all your employees working with or on behalf of Microsoft, both with and without network/building access, are **trained annually on our Supplier Code of Conduct**.

Non-Compliance with these requirements may affect your ability to do business with Microsoft.

What has changed

We ask that all suppliers read the full Microsoft Supplier Code of Conduct, however the table below provides a summary of notable updates.

SCoC section	Notable updates
Legal and regulatory compliance	• **Trade:** Requirement to adhere to Federal Acquisition Regulations and Defense Acquisition Regulation Supplement.
Business practices and ethics	• **Responsible sourcing of raw materials:** Introduction of Microsoft's Responsible Sourcing of Raw Materials (RSRM) Policy and Deforestation requirements.
Health and safety	• **Microsoft Safety Hub:** Introduction of Microsoft's Safety Hub with link to supplemental information.
Environmental protection and compliance	• **Waste:** requirement to implement waste heat reuse and ongoing energy efficiency improvements. • **ESG and GHG reduction:** maintain 100% carbon-free electricity beyond the original 2030 goal.

Questions?

Answers to frequently asked SCoC questions can be found in the FAQ section of the SCoC page.

Thank you to our Microsoft suppliers for your continued collaboration and hard work, helping ensure Microsoft runs on trust.
